linkedin.com/in/manav-dhora

I'm a results-driven Software Developer with experience in leading a project on the principles of agile methodologies. While bringing creative and innovative ideas to the team, I love to learn about new frameworks and platforms to excel in my learning. While working in fast-paced environments, I commit to implementing new strategies to improve productivity. Challenging environments are my forte as I understand the importance of communication and coordination with the team. I have experience and knowledge in programming languages like JavaScript, Java, SQL, and tools like MySql, and Git to manage source code. Efficient communication skills in a collaborative and agile development environment.

SKILLS

Programming Languages	Python, JavaScript, Java, Typescript Prolog,Bash Scripting,
Web	HTML, CSS/SCSS, Apache, React, SOAP, Angular, Node.js, XML
